Engineering Shift Report

Rovema · Day shift 2026-01-12

12 Jan 06:00 GMT to 12 Jan 14:00 GMT

All engineers

Completed reporting period · Version 1

1	1	1	25.0 min
Jobs Raised	Jobs Completed	Jobs Still Open	Engineering downtime

Engineering job status

Completed **1**

Average response: Not Available (0 timestamped requests). Active work duration: Not Available.

Engineering jobs

Raised	Line / machine	Fault / task	Engineer	Work time	Status
12 Jan 09:00 GMT	Rovema / SBS BV2	Top seal fault	Sample engineer	Not Available	Completed

Outstanding jobs · handover

Raised / requested	Machine / status	Issue	Owner	Latest action
12 Jan 04:00 GMT (older)	Casepacker / Open	Infeed jam	Unassigned	Not Available

Fault jobs raised use fault-open time; Engineering request time is not captured. Active work timestamps are not captured. Response averages use timestamped changeover requests only. Job status and handover are as of generation.

SBS BV2 · Top seal fault

Recorded	Engineer	Finding / note	Action / setting	Setting change / reason
12 Jan 09:20 GMT	Not Available	Not Available	Recorded setting adjustment	Not Available

Downtime summary

15.0 min
Planned · 1 events

25.0 min
Unplanned · 1 events

0.0 min
Changeover · 0 events

Handover notes

Synthetic demonstration data - not a live production report.

One older Engineering job remains outstanding.

Synthetic preview only. Check the outstanding casepacker job before restart.

Calculation and traceability

Recorded line-minutes, clipped to period; Not Scheduled excluded. Overlaps allocated once per line: changeover, planned, then unplanned. Event durations may overlap; allocated totals do not.

*Running time is time not recorded as stopped; it is not a verified machine running-time measurement.
